

PILGRIM NUCLEAR PLANT

Duxbury Clipper, Wednesday, February 28, 1996

Citizen's Radiation Monitoring Network

Please attend the Citizen's Radiation Monitoring Network meeting to be held Saturday, March 2 from 10 to noon at the Duxbury Housing Authority's meeting room at 59 Chestnut St. Please don't park in tenant spaces.

We are still looking for more computers. Do you know of a company that is upgrading, downsizing, moving or going out of business? They may have computers to donate to a tax free and very worthy cause. Contact Jack Hoover at 934-6820.

We are always looking for more members. Monitoring emissions from the Pilgrim Power Plant remains very important to our community. The components of the plant are aging. *Electric utilities will be restructuring and less moneys will be put into old and non-competitive sources of electricity - such as Pilgrim.* We can look forward to the decommissioning process beginning but not to the potential for exposure to emissions. Therefore, it is important that we continue to have the funds, equipment and manpower to keep watch.
